We've worked with ABZ on a number of projects - mainly Google Chrome Extensions. The work they've done has been exceptional. The projects we have worked on together have been complex and have involved integration with other systems involving APIs.

The innovation, communication and quality for work has been excellent overall.

Put simply, the guys at ABZ are some of the best developers I've worked with in a 30 year IT career. I have super high standards but ABZ exceed them every single time.
