April 2017

Hi,

I want to express my gratitude to the developers team abz.agency and their CEO Ihor Abyzov for our successful and effective cooperation during the creation and developing front-end part of our Startup project. Abz.agency build a serverless (S3/AWS Lambda) web application and abz.agency implemented front-end part of this project (using Angular 2, REST and related technologies).

Having worked together with Ihor and his team we made sure that they are real professionals who love their job and always try to do their best for you.

Despite the fact that we worked remotely with abz.agency as with the outsource team which they provided for us, we got high quality work and good results. It was not a problem to discuss and resolve all the controversial moments which always happen during the development process. Developers are responsible for their tasks and always try to pull their weight. They are quite experienced to do their work on time and have important ability to meet strict deadlines and work under pressure.

Thanks to the good management and responsible attitude to the work we became a team with abz.agency group during creating our project.

So, thank you guys and keep it up!

Roy Raviv
COO at Shellanoo Group
